

AMENDMENTS TO THE SPECIFICATION

Please cancel the substitute specification filed on May 28, 2003, and substitute therefor the enclosed new substitute specification. The old substitute specification contained numerous references to detail numbers which may cause confusion. The new substitute specification corrects these matters, addresses other inconsistencies noted by the Examiner, and will greatly facilitate prosecution of the application. Applicants submit that no new matter is injected into the application by way of the new substitute specification. A marked-up copy of the old substitute specification is enclosed for the Examiner's reference.
